Loma Linda Acute Care Surgery Goals and Objectives

PGY3

**Goals:**

Loma Linda University Medical Center will provide a learning environment for the care and management of the trauma patient. Surgical basic science, including fluids and electrolytes, wound healing and nutrition, will be emphasized. Clinically, residents will assess the trauma patient, develop clinical judgment on managing these issues, and learn operative skills to address the problem. Careful postoperative care and follow up will be emphasized. Residents will develop cognitive and technical skills in dealing with complex trauma patients.

**R3 OBJECTIVES**

Loma Linda ACS Service will provide a learning environment for the care and management of acute care surgery and trauma patients. Surgical basic science, including fluid and electrolytes, wound healing, nutrition and postoperative management, will be emphasized. Clinically, residents will assess the patients in the Emergency Department and on the floor for acute surgical problems and injuries, develop clinical judgment on managing these issues, and learn operative skills to address the problem. Careful postoperative and post-trauma care and follow up will be emphasized. Residents will develop cognitive and technical skills in dealing with complex, acutely ill patients.

**Responsibilities**

Assist both teams in the care of the ACS patients

Assist R2 with responding to ED consults and traumas.

Assist R1 with responding to floor consults

Round with third ACS attending (when available-Mon through Fri 6:45-12pm) to finish new traumas or consult from overnight

Provide operative coverage for all first start cases

Provide consultation for all off site consultations (East campus and Surgical Hospital)

Give Tuesday morning lecture at ACS signout for 20 mins (provide interesting cases with corresponding learning points and recent literature review)

**Medical Knowledge**
1. Demonstrate understanding of the acute abdomen, including preoperative assessment, resuscitation, and operative exploration
2. Demonstrate understanding of management of sepsis and multisystem organ failure with best practice guidelines in critically ill patients
3. Discuss management of postoperative complications including: anastomosis leak, fascial dehiscence, wound infection, non-healing wound, enteral-cutaneous fistula, intra-abdominal abscess, iatrogenic bowel injury
4. Demonstrate understanding of management of soft tissue infections including necrotizing fasciitis
5. Understand indications of amputations of the lower extremity
6. Discuss management of duodenal and gastric ulcers
7. Discuss management of diverticulitis
8. Discuss management of mesenteric ischemia
9. Discuss management of hernias
10. Discuss management of pancreatitis including pseudocysts

Demonstrate knowledge in the diagnosis and treatment of:

11. Traumatic Brain Injury
   a. ICP management
12. Cervical Spine Clearance
13. Penetrating Neck Trauma
14. Geriatric Trauma
15. Blunt Cerebrovascular Injury
16. Trauma Resuscitation
17. Thoracic Trauma
   b. Diaphragmatic Injuries
   c. Hemothorax
   d. Pneumothorax
   e. Pulmonary Contusions
   f. Rib fractures and rib fixation
18. Resuscitative Thoracotomy
19. Blunt Cardiac Trauma
20. FAST exam
21. Retroperitoneal Trauma
22. Pediatric Trauma
23. Trauma in Pregnancy
24. Spinal Cord Injury
25. Abdominal Trauma
   g. Colonic Injuries
h. Hepatic Injuries
i. Pancreatic Injuries
j. Splenic Injuries
26. Trauma Prevention and Intervention
27. Nutritional Support in the Trauma Patient
28. Venous Thromboembolism
29. Penetrating Arterial Trauma
30. Orthopaedic Injuries
k. Pelvic Fractures

**Procedural:**

1. Arterial lines
2. Central lines
3. Interosseous line
4. Tube Thoracostomy
5. Operate with assistance from R4/R5 and ACS Attending
6. Discuss indications for operative vs non-operative intervention

**Patient Care**

Coordinate efficient transfer of the surgical and trauma patients from the emergency department to the operating room

Learn to interact professionally and productively with consulting physicians and communicating with those services

Develop the skills necessary to lead the evaluation of a trauma or acutely ill surgical patient in the emergency department setting

After completing a thorough history and physical examination, develop competent assessment and plans for patient care

Accurately interpret different diagnostic modalities including: x-rays, ultrasounds, CT scans, contrast studies and MRIs

Discuss treatment options, risks and potential complication of patient with general surgical issues

Become proficient in the assistant surgeon’s role in the performance of general surgical and laparoscopic procedures

Demonstrate knowledge in steps and conduct during major surgical procedures

Have an understanding of when it is not appropriate to operate
Have a clear indication when to adopt non-operative management pathways for the trauma patient and know when to abandon the non-operative management pathway

**Professionalism**

The resident should be receptive to feedback on performance, attentive to ethical issues and be involved in end-of-life discussions and decisions

Understand the importance of honesty in the doctor-patient relationship and other medical interactions

Treat each patient, regardless of social or other circumstances, with the same degree of respect you would afford to your own family members

Learn how to participate in discussion and become an effective part of rounds, attending staff conference, etc.

Complete all assigned patient care tasks for which you are responsible or provide complete sign out to the on-call resident

Maintain a presentable appearance that sets the standard for the hospital this includes but is not limited to adequate hygiene and appropriate dress

Assist with families of critically injure/ill patients and guidance of families towards or through difficult decisions.

Demonstrate mentoring and positive role-modeling skills

Take a leading role in directing the weekly educational conferences involving medical students and junior residents.

**System-Based Practice**

Understand, review and contribute to the refinement of clinical pathways

Understand the cost implications of medical decision-making

Partner with health care management to facilitate resource efficient utilization of hospital resources

Describe in general terms the benefits of clinical pathway implementation

Develop a cost-effective attitude toward patient management

Make meaningful contributions to the multi-disciplinary approach to management of critically ill surgical patients
Comply with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulations regarding patient privacy and confidentiality.

**Practice-Based Learning & Improvement**

Demonstrate the ability to:

- Evaluate published literature in critically acclaimed journals and texts
- Apply clinical trials data to patient management
- Participate in academic and clinical discussions

Accept responsibility for all dimensions of routine patient management on the wards

Apply knowledge of scientific data and best practices to the care of the surgical patient

Facilitate learning of medical students and physician assistant students on the team

Use the LLUMC library and database online resources to obtain up to date information and review recent advances in the care of the surgical patient

Demonstrate a consistent pattern of responsible patient care and application of new knowledge to patient management

Demonstrate a command and facility with online educational tools

**Interpersonal and Communication Skills**

Work as effective team members

Cultivate a culture of mutual respect with members of nursing, support staff, and other specialties

Develop patterns of frequent and accurate communication with team members and attending staff

Gain and appreciation for both verbal and non-verbal communication from patients and staff

Demonstrate consistent respectful interactions with members of nursing and support staff

Demonstrate consistent, accurate and timely communication with members of the surgical team

Demonstrate sensitivity and thoughtfulness to patient concerns and anxieties

The resident will demonstrate the ability to provide and request appropriate consultation from other medical specialists.
