

VA Onboarding Additional Information

- The VA paperwork only needs to be done once and is good for the duration of your residency training.
- Fingerprinting is good as long as your badge doesn't expire. If you let your badge expire, you have to get fingerprinting done again.
- Computer access accounts are disabled after 90 days if you don't log in. Access accounts can be reactivated relatively quickly by contacting the surgery coordinator at the VA, Cornelious Bentley.
- TMS training has to be done once a year. If TMS training expires, you have to complete that, and then contact the surgery coordinator, Cornelious Bentley.
